

# Drop-In Heated Ceramic Glass Hotplate

**Three models in this range cover requirements for 2-4 full size GN pans, trays or earthenware containers.**

**With superior European design and quality throughout, these units come in lengths of 800, 1125 and 1455mm.**

The Ceran hotplate is flush mounted into the stainless steel top for durability and ease of cleaning. Maximum operating temperature of 120°C is adjustable and controlled via a mechanical thermostat. Careful design and placement of the heating elements gives even heat across the ceramic glass hot plate, with faster warm up and better economy.

Designed for 1/1 GN containers, this series of Ceramic Glass Hotplate is available in sizes of 800, 1125, 1455.

This quality European range will complement any buffet/kitchen environment and is the perfect companion to other units in the Emainox Range.
